

--104. Implant for the reconstruction of soft tissue, said implant comprising: one spaghetti-like strand made of a physiologically compatible material having a surface that is wettable by a fluid lubricant.

105. Implant according to claim 104, wherein said implant has a hydrophilized surface.

106. Implant according to claim 104, wherein the surface is hydrophilized surface and the lubricant is aqueous.

107. Implant according to claim 104, wherein the fluid lubricant is swellable.

108. Implant according to claim 104, wherein the fluid lubricant is a polysaccharide or glucosaminoglycan.

109. Implant according to claim 104, wherein a surface of the implant is hydrophobic.

110. Implant according to claim 104, wherein said implant contains fat or oil wetting the hydrophobic surface as the fluid lubricant.

111. Implant according to claim 110, wherein material is a plastic.

112. Implant according to claim 104, wherein material is a silicone rubber.

113. Implant according to claim 104, wherein the material comprises polydimethylsiloxane.

114. Implant according to claim 104, wherein the material is a polysaccharide.

115. Implant according to claim 104, wherein the plastic is cuprophane.

116. Implant according to claim 104; wherein the material has a foam structure.
117. Implant according to claim 104, wherein an X-ray contrast medium or a dye is incorporated into the material.
118. Implant according to claim 104, consisting essentially of said spaghetti-like strand.
119. Implant according to claim 104, consisting of said spaghetti-like strand.
120. Implant according to claim 76, consisting essentially of said plurality of spaghetti-like strands.
121. Implant according to claim 76, consisting of said plurality of spaghetti-like strands.
122. Implant according to claim 90, consisting essentially of said plurality of spaghetti-like strands.
123. Implant according to claim 90, consisting of said plurality of spaghetti-like strands.
124. Implant according to claim 76, wherein at least one of said plurality of spaghetti-like strands are solid.
125. Implant according to claim 104, wherein said strand is solid.
126. A method of implanting the implant of claim 76 into a subject comprising implanting the implant of claim 76 at a desired site of a subject.
